Dear Mr Neal and Organic Standards Board:

This letter is in reference to the National Organic Program, Sunset Review Docket number TM-o4-07. Judy's Family Farm supports the continued allowance of the following substances:

Products	Location on National List
Reasons	
DL-Methione information already submitted	essential for hen health much
Vaccines of poultry production and general hen health	protect hen and human history the improvement in health
Trace minerals of farming experience	required for healthy hens many years
Vitamins years of farming experience	required for healthy hens many

We have been producing organic eggs for almost 10 years and natural eggs for almost 25. We testified in many of the rule making processes in the early 90's and provided support for the above products. This process is becoming a real drain on us to continually review the same issues over and over again. I apologize for not providing support in this document but I found out just today that comments were required again.

Sincerely,

Steve and Judy Mahrt
Judys Family Farm
Certified Organic Eggs
